Jordan Ellis · Fictional demo

Fictional full-stack developer · evidence walkthrough

FICTIONAL CANDIDATE - SAMPLE RESUME AND REAL PUBLIC REPOSITORY EVIDENCE

Session: fa17b7a9-af7d-4ea6-9a3f-faa4cbcc1b2a
Started: 2026-10-30T16:26:09.956Z (UTC)
Ended: 2026-10-30T16:35:47.275Z (UTC)
Profile revision: judge-demo-1c6f1b0fe400

Interview overview

2 recorded questions. This brief compiles the session’s checked AI answers and source references. It does not independently verify employment, authorship, competence, or hiring suitability.

Topics discussed

Databases (1 recorded turn) | Education & experience (2 recorded turns) | Architecture & projects (1 recorded turn) | Deployment (1 recorded turn)

Technical skills mentioned

Kubernetes (1 turn), PostgreSQL (1 turn)

Mention counts describe the conversation, including unsupported questions. They do not establish skill proficiency.

Questions asked

1. What supports PostgreSQL experience?
2. Has the candidate used Kubernetes in production?

Evidence-supported experience discussed

Jordan Ellis claims experience with PostgreSQL in their resume, specifically noting its use in the 'Task Harbor' project for task assignment transactions. [1] [2]

The candidate explicitly states in their resume that they have no experience with Kubernetes. [3]

Areas that remain unverified

1. Independent verification of the candidate's PostgreSQL proficiency beyond their own claims.
2. Details regarding the complexity or scale of the PostgreSQL database schema used in the project.
3. Evidence of PostgreSQL usage outside of the self-reported Task Harbor project.
4. Evidence of Kubernetes usage in production environments.

Suggested follow-up checklist

1. For the question “What supports PostgreSQL experience?”, ask the candidate for a project, source, or concrete example that clarifies: “Independent verification of the candidate's PostgreSQL proficiency beyond their own claims.”.

2. For the question “Has the candidate used Kubernetes in production?”, ask the candidate for a project, source, or concrete example that clarifies: “Evidence of Kubernetes usage in production environments.”.

Useful next steps

Review the referenced material with the candidate. Ask them to explain their personal contribution, reproduce relevant technical decisions, and clarify the unresolved areas. This brief provides interview context, not a candidate ranking.
